

## WEST MAIN STREET REALIGNMENT PROJECT

Thank you for participating in our Open House. After reviewing the exhibits and talking to the Project Team, please help us develop a quality design by responding to a few quick questions.

A variety of streetscape improvements are being considered for the W. Main Street Realignment project. Of the improvements listed below, please pick the most important top five, and rank them with a 1, 2, 3, 4, or 5 (with the number 1 being the most important to you, and the number 5 as the least important).

|  |   |  |   |  |   |
|--|---|--|---|--|---|
|  | Wider sidewalks                                 |  | Benches   |  | Pedestrian crosswalks/crossing improvements   |
|  | Pedestrian-scale lighting (smaller light poles) |  | Receptacles for trash and recyclables             |  | Bicycle racks   |
|  | Street trees                                    |  | Public art  |  | On-street parallel parking  |
|  | Special paving (pavers or paving accents)       |  | Pocket parks/mini-plazas (places to sit and talk) |  | Landscaping/green areas   |
|  | Signs and information kiosks (wayfinding)       |  | Gateway to Kelso feature                          |  | Curb extensions/corner bulbs (helps shorten crossing distance/ improve pedestrian visibility) |
|  | Flower baskets                                  |  |   |  |   |

Please check which of the three items are most important to you:

- Minimizing maintenance
- Durability/longevity of street improvement features
- Sustainable/ecological approaches and materials (“green” treatments)
- Creating a distinctive identity for the neighborhood
- Minimizing cost
- Enhancing businesses/economic development
- Improving aesthetics/creating an attractive streetscape

Is there anything else you’d like the Project Team to know about the West Main Street realignment alternatives presented or the design of this project?
